

KARTHIKA

PROFILE

A dedicated BSc Computer Science with Data Analytics student with a strong interest in programming, data analytics, and software development. Passionate about solving real-world problems through technology, with a focus on Python, Java, and data visualization. A team player with excellent problem-solving skills, eager to learn and grow in a dynamic work environment.

ACHIEVEMENTS

- Successfully developed a Titanic Survival Prediction project using ML and Python
- Worked on a Social Media Community Using Optimized Cluster Algorithm
- Completed coursework in Data Warehousing and Data Visualization
- Strong academic background in Database Management (DBMS) and Data Communication & Networking (DCN)

HOBBIES
